BENJAMIN MWITI

Mechanical Engineer | **Software Engineer**

Kenya | +254799700070 | benjamin515webdev@gmail.com

MECHANICAL ENG SKILLS

- **Machining Operations** – Turning, Milling, Drilling, Grinding
- **Welding and Joining Techniques** – Arc Welding, MIG Welding, TIG Welding, Brazing and Soldering
- **Machine Tool Operations** – Lathe Machine Operations, Drilling Machine Operations, Grinder Operations
- **Material Selection and Testing** – Material Testing, Heat Treatment
- **Manufacturing Processes** – Casting, Forging, Sheet Metal Forming

SOFTWARE ENG SKILLS

- **Front-End Development:** Next.js, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, JSON
- **State Management:** Redux, Redux Toolkit, React Context API
- **Styling & UI:** Tailwind CSS, Styled Components, Material UI, Shadcn/UI
- **Backend & Tools:** Node.js, Express.js, GraphQL, AJAX, RESTful APIs, Storybook
- **Database:** Firebase, SQL, MongoDB
- **Collaboration & Project Management Tools**: Figma, ClickUp, Trello

EDUCATION

- **Kabete National Polytechnic,** Nairobi
  Year of Study: 2019 – 2021
- **Don Bosco Technical and Secondary School,** Embu
  Year of Study: 2015 – 2018
- **St Francis of Assisi Day and Boarding Primary School,** Mitunguu – Meru
  Year of Study: 2005 – 2014

PROFESSIONAL SUMMARY

I am a dynamic and versatile professional with a robust foundation in both mechanical and software engineering. With a strong technical foundation established at Don Bosco Technical and Secondary School and further honed at Kabete National Polytechnic, I possess deep expertise in mechanical engineering (production option). My formative education in hands-on metal work provided a solid base, which was further refined through rigorous training in mechanical systems and production techniques. Complementing this robust engineering background is my self-taught proficiency in modern web design and development, where I master latest technologies. This blend of engineering expertise and digital innovation enables me to create solutions that connect the physical and digital worlds, enhance operations, and boost user engagement. For a closer look at my web development skills in action, explore my portfolio at, benjamin-devspace.netlify.app

PROFESSIONAL EXPERIENCE

Web Developer | 2021 – Present

- **Creative Problem-Solver:** Translate complex client requirements into intuitive, visually striking interfaces that merge modern aesthetics with flawless functionality.
- **Cutting-Edge Solutions:** Drive technical innovation by developing custom animations, interactive features, and performance optimizations that ensure seamless, cross-device usability.
- **Agile Project Leader:** Oversee the full project lifecycle—from concept and design to development and deployment—leveraging agile methodologies and a self-taught expertise to deliver exceptional results every time.
- **Inter-Disciplinary Knowledge, Resourcefulness, and Adaptability:** Led a data-driven project that thoroughly analyzed the East African Community profile by collecting and examining key economic and governance indicators. Transformed raw data into actionable insights through clear visualizations and detailed documentation, demonstrating expertise in research, data science, and analytics.

Production Engineer | Don Bosco Manufacturing Ltd. | 2021 – 2022

- **Precision Machining:** Spearheaded turning, milling, drilling, and grinding operations to ensure components meet rigorous quality standards.
- **Welding & Joining:** Managed arc, MIG, TIG welding, as well as brazing and soldering, guaranteeing structural integrity across projects.
- **Machine Tool Mastery:** Operated lathes, drilling machines, and grinders with precision, streamlining production workflows.
